Color system

The dopamine™ color system is built on clarity, contrast and hierarchy. Each color has a defined role.

Black and White are the core colors. They form the visual foundation and are used for primary backgrounds and typography.

The **Gradient** complements them. It adds energy and depth and can be used as a background. Always use the original gradient files.

Light Grey is used primarily as a background color in digital environments. It introduces structure and separation in UI and web applications while remaining close to white.

Dark Grey and Grey are not background colors. They are functional type colors used for hierarchy — annotations, labels and secondary information.

Blue and Pink are accent colors. They are primarily used within the brand mark and icon language. They activate the system — not dominate it.

Black

#141514
RGB: 20, 21, 20
CMYK: 78, 68, 62, 87

White

#FFFFFF
RGB: 255, 255, 255
CMYK: 0, 0, 0, 0

Gradient

Image bases background.
Do not recreate.
Always use the original file.

Dark Grey

#707070
RGB: 112, 112, 112
CMYK: 53, 43, 42, 28

Grey

#D0D0D0
RGB: 208, 208, 208
CMYK: 22, 16, 17, 1
